Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/542,958	Applicant(s) JACOBS ET AL.	
	Examiner Rodney P. Swartz, Ph.D.	Art Unit 1645	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicants' Response to Office Action, received 11 March 2010, is acknowledged. Claim 1 has been amended.
2. Claims 1, 5, 8, 10, 19, 41 and 87 are pending and under consideration.

Rejections Maintained

3. The rejection of claims 1, 5, 8, 10, 19, 41 and 87 under 35 U.S.C. 112, first paragraph, scope of enablement for a method for inoculating all mammals against *M. tuberculosis* utilizing an attenuated *M. tuberculosis* or *M. bovis* which has a deletion of RD1 and is auxotrophic for pantothenate, is maintained for reasons of record.

Applicants argue that the amendment of claim 1 to recite that the attenuated *M. tuberculosis* or *M. bovis* mycobacterium is administered in an "amount" "effective to confer protection against *M. tuberculosis* in the mammal" obviates the rejection. The argument is based upon the recital in Water et al that "Similar findings with cynomolgus monkey and neonatal calf trials, however, may be indicative of other, non-determined causes of vaccine failure such as inappropriate dose".

The examiner has considered applicants' argument, in view of the statement in Waters et al, but does not find it persuasive. The statement of Waters et al does not explicitly state that the failure of the trials using cynomolgus monkey and neonatal calf was due to inappropriate dose, but that the cause of the failure must be determined by further studies, as stated in the statement immediately prior to statement put forth by applicants.

Until such time as the further studies indicate that the only cause of the failure is due to inappropriate dosage, the evidence continues to support maintaining the rejection that the scope of enablement for a method for inoculating all mammals against *M. tuberculosis* utilizing

an attenuated *M. tuberculosis* or *M. bovis* which has a deletion of RD1 and is auxotrophic for pantothenate, is insufficient supported by the specification.

Conclusion

4. Claims 1, 5, 8, 10, 19, 41 and 87 are finally rejected.
5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
